+20 100 979 7821 Alexandria

Summary

Recent Computer Science graduate and highly motivated Front-End Developer with a strong focus on React development. I possess proven expertise in building responsive, user-friendly web applications using React, Redux, Next.js, TypeScript, and unit testing. Successfully developed a real-time chat application and a fully functional ecommerce site, demonstrating my proficiency in third-party integrations and complex state management. Eager to contribute to a dynamic and fast-paced environment while continuously advancing my technical skills and knowledge.

Education

Bachelor of Computer Science, Kafr El-Sheikh University October 2021 - June 2024 GPA: Very Good (3.3)

Skills

React, Redux, TypeScript, Next Js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Css Modules, Tailwind CSS, Sass, Git, Node.js, Express.js

Internships

Front-End Developer Trainee | ITI Menofia Branch | August 2022 - September 2022

• Developed a responsive e-commerce website using HTML, CSS, Bootstrap, JavaScript, and React.

Front-End Developer Trainee | ITI Mansoura Branch | August 2023 - September 2023

 Collaborated with a team to build a responsive store website using React, HTML5, CSS3, Bootstrap, and JavaScript.

Projects

Financial Dashboard

- simplified version of the financial dashboard that has: A public home page. A login page. Dashboard pages that are protected by authentication. The ability for users to add, edit, and delete invoices.
- o Link on GitHub, Live demo

Graduation Project

- Successfully implemented a real-time chat application with Firebase, demonstrating proficiency in integrating third-party services. The project also highlights experience with chatbots and CRUD operations, showcasing a well-rounded skillset.
- o Link on GitHub, Project Video

Ecommerce-website

- The website is a fully functional e-commerce site that allows users to browse products, add items to their cart, and checkout. The website also features a user authentication system and an admin dashboard for managing products, orders, and users.
- o Link on GitHub, Live demo

Restaurant web site Using Next:

This project is a Next.js application designed to showcase a variety of meals, provide detailed information about each meal, and enable users to create and share new meals with preparation steps. <u>Link on GitHub</u>

Volunteer Work

IEEE Kafr El-Sheikh Student Branch, February 2023 - May 2023

Served as a Front-End Committee Member
